## PHIATON PS 500 HEADPHONES

*Phiaton's finest delivers first-class comfort and sound quality*

**Nottingham, UK** -- Premium personal audio manufacturer Phiaton is delighted to announce its best-sounding pair of headphones yet – the PS 500, top model in the company's Primal Series.

Designed primarily for home use and brought to the UK exclusively by iHeadphones – the UK's largest headphone stockist – the PS 500 is a substantial pair of closed-back headphones delivering exceptional comfort and sound quality. Phiaton's studio-grade 40mm Titanium Driver technology combines with an innovative rear enclosure that greatly reduces the sonic colouration often associated with closed-back designs, resulting in excellent clarity: deep yet unerringly taut bass, open and expressive midrange and crisp, clean high frequencies.

With an extra-wide padded headband and stylish burnished aluminium and black cosmetic, the PS 500 looks and feels as good as it sounds. The outer cup housings are fashioned from high-grade leather, with extra-plush ear cushions for a snug, comfortable fit that is suitable for even the lengthiest of listening sessions. The closed-back construction delivers a high level of isolation from external sounds without resorting to noise

cancelling electronics, thereby helping to maintain a high level of sonic purity, and the cable is sheathed in a braided cloth covering for excellent durability and a tangle-free experience.

Reflecting Phiaton's passion for innovation and ahead-of-the-curve quality, the PS 500 is an exceptional pair of headphones capable of competing with much more expensive high-end designs. Expressive yet always in control, whatever the volume level, they reveal every nuance of recorded sound with neither excessive force nor over-restraint. From the deepest bass to the highest treble, if it's on the recording, the listener will hear it.

The Phiaton PS 500 is distributed in the UK by iHeadphones with a suggested retail price of £199.95. It can be purchased through Amazon or iHeadphones' retail website ([www.iheadphones.co.uk](http://www.iheadphones.co.uk)) at £169.99.

<b>Specifications – Phiaton PS 500</b>

## iheadphones

Launched in 2006, iHeadphones is an online retailer that sells nothing but headphones. It is, in fact, the UK's largest headphone stockist, selling a tremendous variety of headphones from 62 leading brands, such as Beyerdynamic, Denon, Grado, Monster, Sennheiser, Shure and Sony. As well as being an online retailer, the company also acts as the exclusive UK distributor for a number of headphone brands, including Bedphones, Cresyn, Phiaton and Ortofon's in-ear range.
