Denon Advanced Quality Engineering

High-end performance without high-end price tag from Denon's latest in-earphones

July 2009 – Denon, one of the world's leading manufacturers of home entertainment components, has unveiled a new stylish and high-performance in-ear headphone model: the AH-C360 (SRP of £44.99). The newcomer in the company's successful headphone line-up is designed for total comfort and style with unique audio technologies for optimum sound.

For comfortable listening, the model features a new ***Ergonomic Design*** that fits in the ear more securely and also decreases mechanical vibration. A newly developed ***Radial Cascade Damper*** dramatically reduces cable transmitted vibration noise that occurs when touching or rubbing the cable while moving. Denon's portable ***High-quality Sound*** is achieved through an all new ***Hybrid Housing*** with a combination of different materials. In addition, the new headphone features a specially designed ***Acoustic Optimizer*** that ensures dynamic sound and deep rich bass response, with optimum acoustic characteristics achieved by adjusting the sound pressure balance in front of and behind the diaphragm.

For total flexibility, the model comes with a variety of accessories, including multiple sizes of comfortable ear-pieces, extension cables (0,8 m), cable clips and adjusting sliders to ensure perfect fit for every listener. The new model joins Denon's existing line-up of advanced headphones as perfect mobile companions and is available now.

Main Features:

- Radial Cascade Damper reduces cable transmitted vibration noise
- Ergonomic Design for the best fit and increased comfort
- Acoustic Optimizer for clear, dynamic sound
- Hybrid Housing for highest fidelity sound reproduction

AH-C360
- 4 sizes (XS/S/M/L) ear-pieces
- Elastomer (soft plastic) and ABS plastic housing
- 9mm driver
- Semi-hard carrying case
- 0.8m length extension cable with L-shape plug
