TEAC'S NEW REFERENCE 380 SERIES INCORPORATES INTERNET RADIO

Latest Incarnation of Award Winning Mini Component System includes Outstanding Features, Versatility and Sound Quality at a Remarkable Price

TEAC has announced details of its most impressive Reference Series System to date with the introduction of the 380 hi-fi mini component range. The Reference Series 380 is a leading-edge product with state-of-the-art technology and facilities and, arguably, no other system in its class offers such a strong feature set. DAB/DAB+ and Internet Radio, Network Audio, MP3 playback from CD or via a front-mounted USB socket, an optional iPod dock, high-quality circuitry, tone and balance controls, CD Direct function are all included in the three-component system. The inclusion of fully-featured Internet radio, in addition to DAB and AM/FM, is particularly notable at the price.

The complete system – PD-H380 CD Player, T-H380DNT
DAB/AM/FM/Internet Radio Tuner and A-H380 Stereo Amplifier – is available

at a recommended retail price of around **£499.00**, with the optional DS-20 iPod dock (which supports both audio and video and full-remote control over any iPod, including the iPhone) costing just £25.00. This is exceptional value, given the sound quality, build quality and facilities on offer.

Sound quality is at the top of its class, with each component engineered to deliver a performance of impressive scale, detail and refinement. Particular attention has been paid to the amplifier section – the heart of any good music system. No micro component system at the price offers an amp of such comprehensively engineered and finely tuned quality. The A-H380 has been designed to drive virtually any speaker currently available and the end user may choose his/her favourite speakers to complete the system, thus customising the system's performance to suit his/her tastes and preferences.

Each of the three Reference 380 Series components is solidly built and elegantly styled, with impressive attention to detail – for example, the silver edging to the rotary controls. Moreover, in line with future Reference Series products, the 380 system has been tuned for UK audiophiles, as TEAC has utilised the expertise of British audio engineers to subtly fine-tune the system, thus optimising the performance further.

For details of stockists, contact TEAC (details above).

About TEAC: TEAC has changed the lives of many with a series of innovative products initially based upon audio-video relay, recording and storage technologies. Since the original and highly acclaimed Reference 500 micro system arrived in 1995, TEAC's Reference Series products have been designed to deliver high-quality audio in compact, convenient and affordable packages. TEAC's experience, ingenuity and unswerving belief in the value of high-quality sound are what keep its Reference Series micro component systems ahead of the pack.
