

LEXICON I-ONIX SITS BETWEEN ROCK AND A HARD DRIVE

*The Lexicon I-ONIX desktop recording interface range
delivers flawless recordings to match model looks*

The Lexicon I-ONIX series transforms your computer into a professional 24-bit digital recording studio. Cleverly designed to sit in the space between your keyboard and your monitor, the U22 is the range-opener, bringing meticulously thought-out design, in addition to eye-catching looks and comprehensive specification.

The elegant chassis sits inclined at an angle for users, so the clearly laid-out fascia controls, including monitor and input level controls, are always in view and easily within reach. The USB 2.0-equipped interface can simultaneously record two channels – so it's ideal for a guitar and microphone – plus there is a host of further connectivity, including two balanced line outputs and a high-power headphone output.

The U22 package also includes Steinberg Cubase LE4 multi-track Mac and PC recording software, as well as Toontrack EZdrummer Lite virtual instrument software. Naturally, for a Lexicon recording system, the U22 also brings Lexicon's revered reverb, the Pantheon II VST/AU plug-in. With 35 factory presets, ranging from Vocal to Live Sound and Special Effects, these exquisitely rich, full reverbs add dimension and depth to any track.

Part of the I-ONIX Desktop Recording Series, the U22 features Lexicon's newly designed dbx microphone preamps on all analogue inputs. A high-voltage supply drives these preamps, ensuring stability and providing superior recordings across a wide dynamic range. The U22 also, thanks to performance-driven A/D-D/A converters, presents pristine 24-bit/96kHz sound.

A further attraction for all users – whether you are checking your recordings or listening to tunes via the likes of iTunes or Spotify – is the uplift in the sound quality when using headphones routed via your Lexicon interface. The Lexicon I-ONIX U22 – don't sacrifice your desktop or your music....

- **Lexicon I-ONIX U22:** SRP £247.25 (inc. VAT)
- **Lexicon I-ONIX U42S:** SRP £322.00 (inc. VAT)
- **Lexicon I-ONIX U82S:** SRP £494.50 (inc. VAT)

I-ONIX U22 additional Information

- USB 2.0 connection to the Digital Audio Workstation (DAW), up to 480Mbps
- 44.1 to 96kHz sample rates, 24-bit resolution
- Two, four, or eight analogue connections and XLR combi-jack mic/line inputs
- Two analogue TRS (stereo main) outputs
- Dbx high-voltage, ultra-low noise mic preamps on all analogue inputs
- 48V phantom power for each input pair
- Input signal metering via 8 LEDs per channel
- Signal mixing and stereo bus metering
- Up to two 1/4in high-output headphone connections
- Up to two Hi-Z instrument inputs
- Zero latency direct/playback monitoring
- Low latency ASIO drivers
- Pantheon li VST/AU reverb plug-in
- Steinberg Cubase LE4 and Tootrack EZ Drummer software packages
- Supports Windows and Mac platforms

Lexicon introduced the world's first digital processor in 1971. Since then, Lexicon has continuously introduced ground-breaking technology to the audio industry. Today Lexicon processing is heard on over 80% of all recordings – broadcasts, film soundtracks and music alike.
