Denon Advanced Quality Engineering

Denon unveils the D-F107DAB+ - a new stereo all-rounder with incredible sound quality, compact body and DAB+

September 2009 – Denon, one of the world’s premier manufacturers of high-quality home entertainment components, has announced a new versatile Hi-Fi component system that combines high quality sound with maximum connectivity and compact size. The dinky D-F107DAB offers incredible power paired with musical fidelity that you would never expect from a mini system measuring just 25x25cm. Moreover, it allows playback from an incredible array of sources such as CD, iPod, USB or FM/AM/DAB and DAB+ radio.

The system’s DRA-F107DAB stereo receiver incorporates a newly developed power amplifier stage that offers 2 x 65 Watts. This design enables users to hear the details of music on a powerful dynamic foundation. Moreover, the DRA-F107DAB inherits technologies from Denon’s Advanced Evolution stereo series such as the separated block construction or the “simple & straight” circuit design to further improve the sound quality.

The DCD-F107 CD player also benefits from enhanced Denon components. It features a high precision 24-bit D/A converter and other strictly selected parts to achieve a more realistic musical impression. Perfectly matching the main unit, the D-F107DAB comes with a pair of high-quality SC-F107 speakers, which implement technologies derived from Denon’s high-end CX concept and born from extensive European sound-tuning.

The new D-F107DAB features a wide range of connection options. It comes with a front USB port for connecting an iPod (including iPod Direct connectivity) or USB devices. Once attached to the system, users can play their favourite music files (MP3/WMA) stored on these media and can even control the devices using the ‘107DAB’s remote control.

With beautiful sound and a compact design, this high-class audio system will be available in September 2009. Available in a black or premium silver finish in combination with black speakers, the suggested retail price is £599.99 or £449.99 without speakers.

Main features:

Stereo receiver DRA-F107DAB

- 65W x 2 High Power Output
- Dynamic and crisp sound
 - Newly developed power amplifier stage
 - Separated block construction
 - ‘Simple & Straight’ circuit design
- DAB/DAB+ and RDS/FM/AM tuner
- Dock control port, for networked connectivity (optional ASD-11R docking station)
- Portable player connectivity
- MM phono stage
- Two-line front display, to easily identify broadcast stations
- Easy timer setting
- Newly developed remote control

Press information

CD player DCD-F107

- Clean and pure sound
 - Minimum signal path
 - Minimum CD pick-up signal path
 - High precision 24-bit 192 kHz D/A converter and strictly selected parts
- Portable player connectivity
 - iPod Direct connectivity via USB port (digital audio transfer)
 - USB (Mass Storage Class) connectivity
- CD-R/CD-RW playback (MP3, WMA)
- Two-line front display, to easily identify music tracks

Speaker system SC-F107

- Newly-developed speakers inheriting Denon's CX concepts and technology
 - 14 cm D.D.L. cone woofer units with ventilation hole
 - 2.5 cm high definition tweeter with ventilation hole
 - Crossover network, to separate woofer and tweeter to reproduce the smoothness of natural sound
- Anti-vibration Crossbar arranged for optimum acoustics inside the cabinet
- Born from European sound design and Denon collaboration
