

FOR IMMEDIATE RELEASE

Boston Acoustics Debuts Duo-i Plus Dock and Radio Design

-- New Duo-i Plus joins the company's range of high performance tabletop music systems, featuring improved sound for iPhone, new finishes and a serious splash of colour --

The Duo-i Plus from Boston Acoustics builds upon the company's envied reputation for engineering some of the very finest tabletop audio products available.

As the name suggests, it is a development of the company's original, highly respected compact dock and radio design, the Duo-i, but this is so much more than a mere name change.

There is completely new amplification circuitry and the electrical layout has been revised to gain 'Works with iPhone' certification. The end result is significantly improved sound quality as well as enhanced functionality. Add in two smart, new, high gloss black and white finishes, along with dramatically reduced standby power consumption, and you have a radically altered package.

Very much a high-end design, both in quality of finish and audio performance, the £200 Duo-i Plus is for those who want to get the very best from their iPhone or iPod.

Despite its small size, the Duo-i Plus offers remarkable audio quality, with a substantial room-filling stereo sound. The design uses two high quality Boston Acoustics 3.5 inch drive units and includes BassTrac[®] processing to deliver clean, full bass at all levels. The quality of this power section is only improved by a self-damping ABS curved cabinet construction.

Obviously this is a wonderful dock, first and foremost. That said, it is equally happy beside a bed – hence the display that matches a room's ambient lighting as it dims, dual independent his and hers alarm clocks, while the entire front aluminium trim is a touch-sensitive snooze bar – simply touch to turn the radio off! And like all fine bedside companions, this is a precision FM tuner providing excellent reception.

Equally pleasing is the high gloss front panel and cabinet, moulded rubber controls, large high-contrast LCD display and soft blue backlighting.

Oh, and if that wasn't enough, there are four colours variations for the white or black cabinet. You can give your Duo-i Plus a personal touch as part of Boston Acoustics' 'Personal Options Plan' or POP. The Duo-i Plus incorporates speaker grilles that can be swapped with a variety of optional colour variations, taking in Glacier Light Blue, Chili Pepper Red, Rose Bud Pink and Spanish Moss Light Green.

Completing the package are front-mounted 3.5mm sockets for MP3 in and headphone out, rear-mounted line level RCA phono input and outputs, a composite video output, and a funky magnetised remote control.

All in all, the Duo-i Plus combines contemporary design, superb ergonomics and exceptional performance.

Boston Acoustics Duo-i Plus. Suggested retail price: £199. Available December 2009.
