

OMNIMOUNT LIFTS RACKS TO NEW HEIGHTS WITH MODA AND TRIA WALL FURNITURE

The latest line-ups from respected furniture manufacturer OmniMount offer a novel twist on conventional designs, raising the engineering bar for racks and stands, by literally taking them off the floor completely.

The new Tria and Moda ranges free up much needed premium floor space by placing the flat panel screen and any accompanying electronics on the wall. It is a convenient, compact solution, which also hides any unsightly cables and wires thanks to an integrated cable management system.

And whether you choose Tria or Moda, the result is always striking, as both designs are visually pleasing, whatever environment they are in.

Flexibility is also to the fore, with the Tria's three tempered glass being fully adjustable and Moda being of modular construction, while the designs work just as well without a screen. And as ever with OmniMount, beneath the delicate, discriminating design is something of a brute. A high strength to weight ratio means the Moda wall furniture can withstand up to nearly 20kg or 40lbs per shelf.

Despite such remarkable features neither range will break the bank.

For ease-of-installation there is a template to follow. Rugged aluminium construction and included wall stud and masonry mounting hardware secure the modular furniture system. Ease-of-use and simplistic self installation techniques are incorporated into the design, offering less wear and tear, resulting in long-term reliability and makes for quicker installations, a benefit to both the do-it-yourself consumer and the professional installer. These really are hassle-free shelving and cable management solutions for home entertainment needs.

Moreover, as there is no need to route the cables through the wall, the Wall Furniture Systems provides immediate access to all cable and components in the need to service or repair any electrical equipment. The product also includes a 2-year warranty.

About OmniMount Systems

OmniMount is the market leader for A/V mounting solutions in the United States. It employs almost 100 people at its Phoenix, Arizona headquarters and turns over in excess of \$100 million each year.

Founded in 1978, for almost 30 years OmniMount has honed its skills as a pioneer and leader in the field of audio and visual mounts. Although the company started as an audio specialist – it invented the consumer loudspeaker mount – today it offers hundreds of mounting solutions to meet the needs of nearly any application. From mounting the smallest to the largest of speakers, to any size or shape of CRT or flat panel television, and providing an elegant line of stylish and functional furniture, OmniMount products enhance any home entertainment product.

OmniMount's products have been recognised by consumers and industry professionals alike for their groundbreaking engineering, stylish good looks, unmatched quality, ease-of-use and long-term reliability.

OmniMount's highly skilled industrial designers engineer products in-house from the ground up at the company's HQ. The results are always innovative, and frequently deliver new patents. Allied to unparalleled control standards, each OmniMount product is of the very highest quality. Amazingly, OmniMount still manages to sell these designs at incredibly competitive prices.
