

## OmniMount Systems VideoBasics

New range holds screens up 70 inches, weighing up to 90kg,  
with a ultra low 19mm mounting profile

OmniMount, the global leader in consumer and commercial A/V mounting and furniture solutions, has announced the launch of its VideoBasics low profile, flat screen wall mount range. The three-strong line-up has been engineered to adhere to proper panel installation requirements, while minimizing mounting profile. With a mounting profile of only 19mm, the mounts set flat panels just far enough from the wall to allow for easy connectivity and still allow proper cooling.

Convenience is another key to the VideoBasics mounts, with exceptionally easy installation. This line has all the features installers are accustomed to from OmniMount: Lift n' Lock™ for easy installation, locking bar for added safety and security, sliding lateral on-wall adjustment, universal rails for maximum compatibility, open architecture for simplified wiring and an installation template.

OmniMount's VideoBasics mounts are manufactured with the best quality standards in the industry for durability and functionality with an innovative design. Available in three sizes to fit most any medium to extra large flat panel, these slim profile mounts are made from heavy-grade steel and boast aggressive MSRPs starting at £55.

*"OmniMount continues to be dedicated to providing innovative mounting solutions to accommodate all needs and price points and our latest offering is VideoBasics," said Alex Robertson, senior vice president of sales and marketing for OmniMount. "With panels getting lighter and thinner, we saw the need for a complementary mounting solution; by coupling this appropriately-thin design with an installer-friendly single wall plate, we expect installers and consumers alike to love this new offering."*

The VFM, VFL and VFX accommodate most flat panels from 23 to 70 inches and up to 90.7 kg. The VideoBasics mounts are all UL listed, which means that they've been tested and approved to hold more than four times their published weight capacity.

Available for immediate shipping now, the VFM, VFL and VFX have aggressive MSRPs of £55, £65 and £80 respectively.
