Denon Advanced Quality Engineering

Little brother broadens Denon's reference Blu-ray bloodline

November 2009 – Denon, one of the world's premier manufacturers of high-quality home entertainment components, has introduced the DBP-4010UD, a state-of-the-art universal Blu-ray disc player with many of the same leading-edge technologies and features found in Denon's award-winning, reference-class DVD-A1UD model.

The new heavyweight offers outstanding audio and video performance thanks to its strictly selected components and proprietary Denon superior build quality.

The DBP-4010UD lets home cinema enthusiasts not only enjoy Blu-ray discs and DVDs but also a wide variety of other formats such as Super Audio CDs, DVD-Audio discs and CDs - all at reference-quality replay. Contributing to this level of quality are Denon's vibration resistance technologies, such as the Direct Mechanical Ground Construction, a multi-layer chassis structure and the newly developed S.V.H. mechanism drive. The audio circuitry features Advanced AL24 processors, for all channels, to achieve superior sound quality. Moreover, the DBP-4010UD is equipped with DENON LINK 4th to virtually eradicate jitter during HDMI transmission. When combined with a Denon AV receiver that supports DENON LINK 4th as well, the best possible sound performance is achieved.

The player's video section features leading-edge ABT (Anchor Bay Technologies) VRS processing for the highest-resolution video available with brilliant upconversion and i/p scaling to 1080p, from even lower-standard definition sources. Through the separation of analogue and digital video circuits, the user can enjoy the most faithful video playback. Denon unique technologies, like the D.P.I.C. (Denon Pixel Image Correction) or Digital Noise Reduction, add to the natural and lively image reproduction.

The new DBP-4010UD not only offers the ultimate in audio and video, it adds unprecedented connectivity and compatibility with various media formats. An onboard Ethernet port allows for Internet connectivity, firmware updates, BD Live interactivity and Web Control support. AVCHD playback from DVDs, DivX, JPEG, MP3, WMA, AAC and WAV playback from DVDs or SD (and SDHC) attached to the front card reader add to the multiple opportunities the new top class player offers.

The Denon DBP-4010UD, an elegantly styled entertainment solution, is the best match for Denon's award-winning new AV receiver line-up including the recently introduced Denon LINK 4th-equipped AVR-4810 and AVR-4310.

The DBP-4010UD will be available at the end of November in a black or premium silver colour finish at a suggested retail price of £1899.99.

Press information

Construction:

- Direct Mechanical Ground Construction, embodying concepts for thorough vibration resistance
- Original New Advanced S.V.H. mechanism, developed by Denon for low centre of gravity, minimal vibration, quiet operation and high precision
- 6-block Structure for thorough protection from mutual interference caused by electricity or magnetic fields; 10.0 kg weight

Audio Quality:

- Dynamic Discrete Surround Circuit-HD (D.D.S.C.-HD), achieving high-quality sound
- DENON LINK 4th to achieve jitter-free transmission of digital audio via HDMI
- Advanced AL24 Processing Multi Channel, Denon's proprietary technology that optimizes audio performance
- Dolby TrueHD and DTS-HD Master Audio decoding
- Support for SACD, DVD-Audio and HDCD

Video Quality:

- Denon video circuitry for high picture quality, to produce a richer video image from DVD [high-bit-rate video processor from Anchor Bay Technologies]
- 3-D Digital Noise Reduction, to optimize effects for both SD and HD content
- 1080/24p output, for maximum enhancement of film texture
- Denon Pixel Image Correction (D.P.I.C.), for more natural curvature correction
- Vertical Stretch (supporting the CinemaScope aspect ratio for anamorphic lense)
- Source Direct, to output disc content in its original resolution
- HDMI (ver. 1.3a, supporting Deep Colour, High Bit Rate Audio output)

User Friendliness:

- Easy-to-read and easy-to-operate G.U.I. (Graphical User Interface)
- Support "BD-LIVE" and "BONUSVIEW" functions
- Support for HDMI Control (Consumer Electronics Control)
- Glo-key remote control unit
