## PRESS RELEASE

### For Immediate Attention

## TEAC Introduces Model R-4iDNT Super Slim DAB Radio System

Offers Desktop WiFi Internet/DAB/FM Radio with iPod Dock

TEAC has announced the introduction of the R-4iDNT, a sleek desktop radio which offers a great deal at a highly affordable price.

The R-4iDNT plays music stored on an iPhone without missing incoming calls and texts, while the user is listening – not just to the iPhone but also to radio stations via the internet, DAB or FM. NXT's new BMR speaker technology allows for a slimline build without sacrificing excellent bass response, coupled to crisp midrange and treble. The built-in Internet Radio tuner delivers a multitude of music from around the world while the DAB/FM tuner also connects to local stations.

In addition, as the user plays back playlists on the iPod/iPhone, the music ID will be sent to the Last.fm server, which analyses musical taste and delivers similar types of music next time at Last.fm.
