## PRESS RELEASE

### For Immediate Attention

## TEAC Introduces the AURB iPod® Dock, CD Player with FM Radio

### Offers Radical Design and Class-Leading Performance

TEAC has announced the introduction of its model SR-100 – the **AURB**. The AURB is a complete hi-fidelity sound system incorporating iPod Dock, CD Player and FM Tuner. It also incorporates USB and AUX.

The AURB represents a stylish one-piece audio component departure for TEAC, a company long known for producing elegant and superbly engineered, high technology mini and full size audio hi-fi products, home cinema amps, DAB and Wi-Fi radios. It is this combination of affordable style and unmatched innovation that sets TEAC ahead of the rest and has brought about the introduction of the AURB. Its distinctive, fashionable, smooth curved lines matched with outstanding performance and versatility sets the AURB in a new class of complete audiophile systems.

As a standalone sound system the AURB's performance is made all the more impressive by the 50 watts per channel power output, ensuring audiophile sonic qualities. This is unusual in products of this type and at this price.

**About TEAC:** TEAC has changed the lives of many with a series of innovative products initially based upon audio-video relay, recording and storage technologies. Since the original and highly acclaimed Reference 500 micro system arrived in 1995, TEAC's Reference Series products have been designed to deliver high-quality audio in compact, convenient and affordable packages. TEAC's experience, ingenuity and unswerving belief in the value of high-quality sound are what keep its component systems ahead of the pack. With a commitment to offering all the latest technology options to its customers, TEAC continues to lead the field in innovative quality home entertainment products.
