PRESS RELEASE

For Immediate Attention

TEAC INTRODUCES THE A-R650 STEREO AMPLIFIER

Offers Power and Flexibility at an Affordable Price

At 90 watts per channel, the AR650 is twice as powerful as many stereo amplifiers at the price and has the ability to drive just about any speaker you care to partner it with. Carefully selected components create a crisp and clean sound quality that's also well defined.

With no fewer than 7 inputs, the A-R650 is able to handle the most complex of systems. Also standard is an MM phono stage, ensuring that you can plug in a turntable. More unusual but very welcome is the microphone input with separate level control, making the A-R650 perfect for semi-professional or commercial use. Added to this you'll find two sets of speaker outputs and a headphone socket.

The control layout is clear and logical with the volume and source selector knobs being particularly precise and easy to use. In addition, a full remote

control with the option of controlling other TEAC components such as the T-R650 tuner is also included.

A-R650 Stereo Amplifier - Product Description Summary

- 7 Inputs (5 Audio + 2 Video)
- MM Phono Stage
