ARMOUR HOME'S SYSTEMLINE HOMENET AND SYSTEMLINE MODULAR INSTALLED IN PRESTIGE E-LIFE PROJECT IN GUERNSEY

**Royal Terrace Luxury Apartments and Penthouses
Development with Views over St Peter Port**

Armour Home's Systemline brand has once more been chosen as the system of choice as part of a magnificent prestige residential development in Guernsey.

The Royal Terrace, a Long Port Group development, comprising 48 luxury apartments and 8 penthouses with panoramic views over St Peter Port's picturesque marinas and across the sea to Guernsey's sister isles, is a truly outstanding example of luxury and style coalescing with the highest quality technical and environmental know-how.

An E-LIFE project, each new property on the Royal Terrace is built to an excellent specification with the very best in fittings and finishes and is equipped with the latest in home technology, giving the owner total control over the environment and comfort in their home than ever thought possible. Each apartment is pre-wired for a range of E-LIFE audio visual packages which can be tailored to the owner's requirements. Multi-room music, home cinema options, bathroom TVs, high definition TV and high speed internet access means Royal Terrace is fully equipped with the latest technology.

Armour Home's Systemline HomeNet enclosures are installed as standard with provision for broadband and phone lines fed throughout each Royal Terrace property. All apartments are also pre-cabled for Systemline Modular with option packages from basic audio distribution and control, through to full touch screen automation including the heating and lighting controls.

The Systemline HomeNet enclosures provide the central hub from which all incoming services are distributed via Cat5e and coaxial cables throughout the home. The central enclosures provide maximum flexibility - integrating home automation with the ability to house the market leading multi-room audio and video hubs from Systemline Modular. Once installed in the home, the Systemline HomeNet system provides a future proof infrastructure linking multiple computers, telephones, audio and video equipment.

Systemline Modular offers the ideal multi room system, with the ability to listen or watch whatever you want to, in any room of your home. The solution is a non-intrusive, discreet system - literally built-in to the fabric of your home in much the same way as central heating, lighting or plumbing. All that you would typically see are very discreet flush mounted ceiling speakers and elegant in-wall keypads rather than a mishmash of boxes intruding into your living space. Systemline Modular Home Entertainment systems comply with all required building regulations and are installed to the highest possible standards. In just 5 years, Systemline Modular has chalked up an impressive 10,000 installations in new-home developments throughout the UK and Éire.
