PSB Offers Dedicated Imagine AV Speaker System for UK Market

Maintains Excellent Value – Now Complete with New Rears and Subwoofer

The Imagine series of loudspeakers from Canada's PSB Speakers, was always designed to become a standard of value among audio and home-cinema fans for whom real-world sonic performance is the salient criterion of excellence. Yet at the same time, PSB expects the Imagine models to reset expectations of just how an "affordable-high-end" loudspeaker can look, and of the quality standards to which they can be crafted. The Toronto based firm, for 36 years acknowledged worldwide as one of the leading creators of high-performance speakers, expects the PSB Imagine to find instant favour among buyers who covet the widely admired abilities and arresting forms of its acclaimed Synchrony designs, but who have been deterred by those models' not inconsequential cost.

The new PSB Imagine Home Cinema system – dedicated to the UK market – comprises the Imagine T three-driver, two-and-a-half-way tower full-range floor-standing design, and the new Imagine B two-way stand/bookshelf-mounts, which are intended primarily for rear-channels playback. The Imagine C is a dual-woofer, horizontal two-way centre-channel speaker. All three Imagine models share a common driver family, with a very high-output 5.25-inch woofer, and an impressively wide-band and ultra-accurate, titanium-dome 1-inch tweeter. To integrate and complete the perfect PSB Home Cinema System, the very compact (less than 1 foot sq) SubSeries HD8 subwoofer is chosen. To overpower the laws of physics the HD8 employs Dual Opposing Heavy Passive Radiators to "fool" the HD8 cabinet into behaving as a much larger enclosure with much larger, longer ports.

UK Recommended Retail Prices

Imagine T (3-driver tower) £1225.00/pair

Imagine B (two-way stand/bookshelf) £695.00/pair

SubSeries HD8 Subwoofer £800.00

Imagine C (2-way centre-channel) £495.00/each.

Available now – Finish: Black
