#### **NAD INTRODUCES NEW ENERGY-SAVING C426 'AUDIOPHILE' FM/AM TUNER Emphasis on Sound Quality Maintains NAD's Reputation for High Performance and High value**

NAD Electronics has introduced the C426 'audiophile' FM/AM Tuner, offering ultra-low standby power, a new sleek design, and a host of convenient features.

With true audiophiles favouring the superior sonic performance of FM broadcast over that of DAB, NAD concentrates on this by producing a quality tuner for those who want to listen to music. The C426 builds on the strengths of previous NAD tuners by offering reception quality that rivals that of today's broadcasts. This tuner gets the maximum out of the airwaves by employing a MOS-FET RF Front End design, high quality components, and careful PCB layout. With these features, NAD is able to achieve excellent sensitivity with low intermodulation distortion to provide a musically satisfying performance. Even the AM section of the C426 retains excellent clarity together with lowest possible background noise.

In line with global concern over climate change, NAD has completely redesigned the power supply for improved efficiency and extremely low power consumption during standby while still allowing all remote activation and control interfaces.

The C426 FM/AM Tuner is easy and convenient to use with its 30 available presets in any combination of AM and FM stations; nameable presets (up to eight characters) for AM and non-RDS stations; RDS PS (Program Service) that automatically displays the name of the radio station; RDS RT (Radio Text) that displays additional information broadcast by the radio station (such as the artist and/or song); Auto Search for optimised tuning; and a "Blend" feature that narrows stereo

separation and improves noise.

**Key features of the C426 FM/AM Tuner include:**

- RDS PS (Station name) and RT (Radio text)
- 8 Character preset naming capability for AM and non-RDS stations
- 30 Station random presets (AM or FM)
- VFL display
- MOS-FET RF Front End
- RS-232 Interface
- IR Input
- NAD Full Function Remote Control
- <0.5W Standby power consumption

The C426 FM/AM Tuner is available now from authorized NAD retailers at a suggested retail price of £230.00. It can be purchased in either a Graphite or Titanium finish.
