

## OmniMount Systems Link Series

Link's modular design accommodates any home entertainment system while its contemporary finish enhances any room

OmniMount, a leading manufacturer of furniture for home entertainment products, has introduced the luxurious Link Series to its portfolio of high quality, award winning designs. The sleekly styled and beautifully finished Link Series features four distinct pieces — the LT63, LDC31, LC31 and LS31 — that easily combine to create an elegant, single piece that will satisfy every requirement. The units are finished in high gloss black, with black glass and brushed Nickel supports.

Zach Eyman, OmniMount's chief of design stated, "the four interchangeable pieces work together to form unique configurations which can be customized to all home entertainment systems and more. Its high gloss black finish is also designed to make a contemporary fashion statement."

At the centre of the modular Link Series is the £659.99 LT63, a combined table and cabinet that accommodates TV screens up to 65 inches and weighing over 10 stone. It features two enclosed cabinets that provide concealed storage for audio and video components, as well as an open area to house additional components or media. Flush hinges on the drop-down doors offer unobstructed interior space. The LT63 features a contemporary high gloss black finish, black glass and brushed nickel accents.

To accommodate larger entertainment systems, the Link Series' LC31 and LS31 can be added to create a furniture system to accommodate every conceivable home entertainment system. The £289.99 LC31, a stackable cabinet in the same finish as the LT63, features removable legs that allow the cabinet to be stacked on another or rest on the floor. The £79.99 LS31 is a shelf designed with black glass and brushed nickel legs to expand the design when additional audio storage or display room is needed. The LC31 and LS31 each support up to 23kgs, so they can easily accommodate most components. Completing the quartet is the £579.99 LDC31, which offers two enclosed cabinets, one above the other, and can hold equipment weighing up to 45kg.
