

## **ROTH AUDIO CENTRE AND SUB CREATE A WINNING AV TEAM**

*Roth Audio expands its competitively priced OLi speaker range adding the OLi C2 centre channel monitor and OLi KH2 subwoofer*

The arrival of the C2 centre channel and KH2 subwoofer – complimenting the existing three-model OLi series speaker line-up – means Roth Audio’s successful entry-level range now meets the requirements of home cinema fans, as well as two-channel aficionados.

Recognising the key role played by the centre channel in home theatre systems – the middle monitor typically accounts for up to 70% of the sonic action, including the majority of the vocals – the C2 is designed to seamlessly blend with its OLi range siblings. Furthermore, the presence of twin 13cm drivers mean this centre speaker is fully equipped to meet the challenge of delivering full-bodied, realistic sounding vocals.

The KH2 subwoofer is equally well armed for its role in your AV system. Packing a 20cm forward-firing active driver, backed-up by similarly-sized dual passive depth drivers, this impressive box houses a 125 watts amplifier and delves down to 35Hz. The sealed enclosure device enables tight frequency control, while the triple driver design helps create bass thunder.

In keeping with Roth Audio's approach to product design, the new kit looks great as well as sounds superb. The maker finishes the C2 centre speaker with the same high level of care and attention given to the rest of the OLi family – a real treat at this welcoming price-point – and the KH2 performs the rare trick of being a 'good looking box'. Additionally the OLi subwoofer is designed with optimum usability in mind – equalisation settings, as well as the volume control, are located on the roof of the unit enabling easy access.

Roth Audio founder James Roth says, "These beautiful new additions complete the OLi family – for now! – and mean surround sound fans can now enjoy the OLi range's remarkable combination of looks, performance, and value. Turn It Up."

The Roth Audio OLi C2, available in June, has an approximate suggested retail price of £99.

The Roth Audio OLi K2, available now, has an approximate suggested retail price of £199.
