

ROTH'S REVOLUTIONARY WI-FI DOCK FREES YOUR IPHONE'S MUSICAL SIDE

For just £99, the pioneering RothDock enables wire-free music streaming from Apple 2G and 3G iPhones, as well as iPods, to any hi-fi system

The best ideas make instant sense... and this is one of them. Roth Audio's Wi-Fi equipped iPhone/iPod dock lets you listen to music stored on your portable, from the comfort of your sofa. Forget heaving yourself from your favourite seat to select a different track – simply hook-up your music system to the supplied wireless receiver, drop the RothDock by your side, pick-up the neat little remote, and lay back.

It works like this: you slot your chosen Apple portable – the RothDock is compatible with the iPhone and the iPod – into the dock and place the unit somewhere convenient. Next, you simply plug the receiver base into your hi-fi, and that's it, you're good-

to-go. Thanks to its rather cunning technology, the RothDock and receiver can sit up to 10m – that's 33ft in 'old money' – apart and still communicate.

Roth Audio Press Release

A major attraction of this design is, for those who are perfectly happy with their existing hi-fi set-up, there is no need to invest further funds in a dedicated speaker dock. That said, existing owners of suitably-equipped speaker docks can also enjoy the RothDock's wire-free ways – all you need is a system that houses a 3.5mm stereo jack or twin RCA inputs.

Oh, and don't worry about missing an important call to your iPhone: if you receive a call, the music fades and you hear the ringtone through the hi-fi system. For even further convenience, while your chosen Apple portable is in place, the RothDock recharges its battery. And, while the RothDock works beautifully with Apple's ranges of iPhones and iPods, it also happily operates with other-brand MP3 players and mobile phones – all you need to do to get started, is connect the supplied 3.5mm lead. Simple as....

Roth Audio founder James Roth says, "We discussed this one at length: we wanted a product that allowed us to dock and charge our iPhone/iPod and then play music – even if we wanted to listen to it in another room. The RothDock meets these requirements and better still, if it's an iPhone you're using, there's no chance of you missing a call. Turn It Up."

The RothDock will have an approximate suggested retail price of £99.
