

## **SCREENS KEEP A LOW PROFILE WITH LATEST OMNIMOUNT RANGE**

It seems the world is getting thinner. Apple has just released the Air laptop. LCD screens will soon be measured in millimetres, not centimetres. And making sure you keep abreast of the latest trends is OmniMount with its new Ultra Low Profile Series flat-screen wall mounts.

Comprising three ultra-low profile tilt mounts for LCD and plasmas, this new series features a remarkably shallow mounting profile – with screens being held just 38 millimetres off the wall in the fixed position – ensuring that flat panels feel almost as part of the wall, rather than being just plonked onto it. And what little you can see looks rather nice thanks to a fetching anthracite finish, with extruded aluminium end caps concealing the mounting hardware to present a clean side view.

Another important fact to remember is that as screens slim down, they are also increasing in screen size. The need to for them to blend in has therefore never been greater. The line-up supports screen sizes ranging from 26" - 75" and bear loads of up to an astonishing 140kgs. These mounts reinforce OmniMount's leading position of giving users stylish, yet highly functional products.

The Ultra Low Profile Series is manufactured with the best quality standards in the industry including durability, function and design. Available in extra large (X), large (L), and medium (M), these low profile mounts are made from heavy-grade steel and have a durable anthracite powder coat finish. This line also includes all the features installers are accustomed to from OmniMount: 'Lift n' Lock' for easy installation, locking system for added safety and security, sliding lateral on-wall adjustment, universal rails for maximum compatibility, open architecture for simplified wiring and an installation template.

To make mounting and wiring flat panels even easier, OmniMount has designed an innovative built-in kickstand so access to wiring post-installation is remarkably simple. This requires only one person and no vertical lifting of the flat panel. When in use, the kickstand holds the bottom of the flat panel away from the wall so only one person is needed to complete the wiring.

Prices:

ULPT-X: £279.99; ULPT-L: £229.99; ULPT-M: £169.99
