

## **THE NEW TRIA – HOUSING YOUR ELECTRONICS OFF VALUABLE FLOOR SPACE**

The latest introductions from respected furniture manufacturer OmniMount offer a novel twist on conventional designs. OmniMount's new Tria Series raises the engineering bar for racks by taking home entertainment equipment off the floor completely.

The newly introduced Tria One and Two designs free up much needed premium floor space by placing any electronics that accompany a flat panel TV on the wall. They are an extremely compact, convenient solution, which also hide any unsightly cables and wires thanks to an integrated cable management system.

Modular in design, the one-shelf Tria One and two-shelf Tria Two offer hassle-free shelving designs suitable for any environment.

Based on the success of the original three-shelf Tria System, which was launched in 2006, the Tria Series enables users to organize electronics - as a Blu-ray player, soundbar, or Wii console - right underneath a flat panel, but without ugly cable connections visible. Not that they need to be used solely with screens, being perfectly adept at housing products such as an iPod docking station on their own.

"The brilliance of the Tria Series wall shelf system lies in its simplicity," said Brett Stenhouse, vice president of marketing for OmniMount. "The entire series allows for an easy, clean, "invisible wire" installation, without the hassle, mess and expense of running the connections through walls."

Customizable for any application, the Tria Series feature shelves made of 6mm tempered glass that can be adjusted in 1" increments and can hold up to 14kg. These easy-to-install wall shelves are available in two styles: black with black glass, or platinum with clear glass. The trimmable wire covers, which snap easily onto the spine to route and conceal wires, are also paintable for customers interested in matching the cable management covers to their wall colour.

The Tria 1 and Tria 2, which are one- and two-shelf systems, respectively, complement the flagship of the series, the Tria 3-shelf wall system. Each piece is compatible with

the others in the line, offering a modular solution easily customizable to any application.

**Tria One** - £49.99 inc. VAT

- One 6mm tempered glass shelf
- 13.6kg maximum shelf capacity
- Available in black with black glass and platinum with clear glass
- 17.5" w x 16.5" h x 16.3" d
