

## **Feel the power: OmniMount unveils Power40 motorised mount for flat screens**

*Tilt, pan and swivel LCDs or plasmas from the comfort of your sofa  
with the touch of a button*

The OmniMount Power40 is a state-of-the-art, remote controlled, motorized mount for a LCD or plasma screen that allows you to tilt, pan and swivel the flat panel from the comfort of your sofa, bed or wherever you happen to be sitting.

With the touch of one button the Power40 – part of OmniMount’s award-winning MotionPicture Series - delivers maximum viewing flexibility from anywhere in the room. With a virtually silent 40dB motor, such remote controlled automation offers the ultimate convenience and comfort for today’s homes.

OmniMount’s Power40 is a cantilever mount that fits most flat panels with screen sizes from 23 inches to 40 inches and weighing up to five stone or 30kg. It sits just 2.7 inches from the wall when in the fixed position, tilts from zero to 15 degrees to reduce glare, and pans from zero to 20 degrees left and right to accommodate almost any viewing position.

To ensure safety, the Power40 features programmable wall detection, as well as safety mechanisms that stop motion when movement is obstructed. As with every MotionPicture Series mount, installers can expect open architecture for easy access to in-wall wiring, an installation template and level, as well as OmniMount’s exclusive Lift n’ Lock™ design for easy installation. The fact it can be mounted onto a single-stud makes it an even quicker install.

OmniMount Power40 SRP: £299.99. Available now.
