## PRESS INFORMATION

For Immediate Attention

### **NEW BENCHMARK 5.1 HOME CINEMA SPEAKER SYSTEM FROM KEF Stylish KHT 3005SE Series Now Available**

KHT3005SE is an extremely high performance, yet room-friendly home cinema system, which raises both the design and performance benchmarks in the category of elegant home cinema speaker packages.

#### **SATELLITE**

The specially shaped curved aluminium enclosures make for an acoustically ideal housing. Simply put, the KHT3005SE satellites sound much better than traditional rectangular loudspeakers. The addition of the 'Tangerine' waveguide to the Uni-Q array increases the sensitivity of the upper HF creating better sound dispersion. The adjustment of the satellites' tweeter for better clarity and integration has resulted in producing a richer and sensationally detailed sound quality. KEF's 'sit anywhere' Uni-Q technology disperses sound around the room so well that you can 'sit anywhere' to enjoy the optimum surround experience. The radical new 'sealed suspension technology™' incorporated in the speaker driver makes for cleaner, smoother response: The satellites can play astonishingly loud, without sounding unpleasant. The distinctive ribs visible on the speaker cone improve rigidity. This makes for a clean, natural and dynamic sound. Removable magnetic grilles. Satellites are

available in Pair packs or as part of the KHT3005SE 5.1 system consisting of 4 satellites, a centre speaker and a subwoofer.

### **CENTRE SPEAKER**

Carrying up to 60% of the sound, the centre channel is vital in any home cinema system, and the new dedicated centre speaker, HTC3005SE, is in a class of its own. This is why our engineers have made it bigger than the HTS3005SE satellites. Increased power handling for extra "slam" and superior dialogue reproduction. Twin 75mm (3in.) bass drivers give the necessary frontal impact; all important when watching a movie. Sit anywhere' Uni-Q technology assures perfect timbre matching to the HTS3005SE satellites. Furthermore, sound definition still remains crystal clear, even when not sitting immediately in front of, or not listening at the same height as the loudspeaker position. Crossover has been engineered to balance and match the satellites crossover resulting in a more detailed, balanced and brighter sound. Centre speakers are available individually or as part of the KHT3005SE 5.1 system consisting of 4 satellites, a centre speaker and a subwoofer.

### **SUBWOOFER - HTB2SE**

So gorgeous: HTB2SE is the first subwoofer at this price level that you will want to show off! Ultra-reliable high efficiency 250W class D amplifier. Plays very loud and clean all day long, if necessary 250mm (10in.) driver with matching passive bass radiator. This configuration ensures that the surprisingly small enclosure reaches down to give astonishing deep bass, and can deliver both awesome movie effects and subtle musicality, as needed. Flexible positioning. Depending on your space requirement or your visual preference, vertical or horizontal orientation is possible. Acoustically inert enclosure shaped to eliminate internal standing waves. SmartBass™ 'connect and go' feature for simplicity of set up. Our engineers have carefully designed HTB2SE to be as simple and practical as possible; just connect it to the mains and your AV receiver to be assured of optimum performance without the hassle of "tweaking". HTB2SE is available individually or as part of the KHT3005SE consisting of 4 satellites, a centre speaker and a subwoofer.

Suggested retail price complete – in the region of £1000.00- £1300.00.
